

LENXION

What is this?

This is an old platformer that I built in 2008 with C++ and Allegro 4. It was my first platformer.

Please forgive the poor file placement within the Lenxion folder. If I still had the source code to this game, I would fix it up. ;P

How do I play?

Movement: W, A, S, D, or use the Arrow Keys

Jump: Space, W, Up, or Right Mouse Button.

Attack: Aim with the mouse and click at an enemy.
You can shoot through walls.

Exit Game: F4 or Escape

Toggle Fullscreen: F5

Credits

Rachel J. Morris
Programming, Artwork, Music

Programmed with Allegro 4 and C++
